

GLW **Diamond** dairy compounds are formulated to provide high energy together with a generous supply of by pass protein. **Diamond** ensures a good balance of starch, sugars and digestible fibre. **Diamond** dairy cakes are typically fed to herds achieving up to 8,000 litres. The **Diamond** range is seasonally available at protein levels of 16%, 18%, 21% and 24%.

Diamond Dairy Compounds

A genuine high energy dairy compound, well suited to grass silage systems, or where maize/ wholecrop silage provides up to 50% of the forage dry matter. Ideal as a parlour feed, or fed through out of parlour feeding systems.

Formulated from the following high-quality raw materials; Wheat, Maize, Barley, Hi-Pro Soyabean Meal, Distillers Grains, Maize Gluten, Rapeseed Meal, Sugarbeet Pulp, Wheatfeed, Toasted Soya Hulls, Molasses, Minerals and Vitamins.

Characteristics	Advantages
High energy density	Complements the use of home grown forages
Mix of starch sources and degradabilities	Provides the necessary energy for today's cows. The mix of energy sources ensure a range of degradability rates in the rumen, and in the lower gut to promote milk yield and protein
Quality, high energy proteins	Supplies by-pass protein to support higher yields
Range of digestible fibre sources	Stimulates dry matter intake, ensuring optimum rumen function
Good quality mineral, trace element and vitamin pack, with added vitamin E	Fully mineralised to support milk production when fed at 0.4kg/litre

As with all our feeds, the **Diamond** range comes with the "GLW Positive Response Commitment", including access to experienced technical support, dedicated customer service, raw material, and transport teams, ensuring that you receive what you want, when you need it.

..... Your feeding system for lifetime performance
