

The GLW **Free Range Chicken** feeds are specifically formulated to meet the needs of outdoor, slower growing birds, typically slaughtered at 70 days or more.

Free Range Chicken

The nutrient content of the Free Range Chicken feeds are well balanced to help maximise good gut health and bird development, whilst supplying the correct level of vitamins and minerals.

Both the Starter Crumb and Grower Pellet contain Elancoban G200 whose active ingredient is Monensin.

The Withdrawal rations must be fed prior to slaughter as a 1 day withdrawal period must be observed on the Grower ration which contains Elancoban G200

Withdrawal rations 1 and 2 are nutritionally identical, but Withdrawal 2 contains 50% less pigment (Nutrigold Yellow, a natural colourant) for those farmers needing a less intense skin color in the finished bird

Product	Code	Feeding Age	Protein %	ME (MJ/kg)
FR Chicken Starter Crumb + ACS	P70050	0 to 21 days	18.0	11.8
FR Chicken Grower Pellet + ACS	P70051	22 to 49 days	16.2	12.0
FR Chicken Withdrawal Pellet 1	P70052	50 to kill	15.1	12.0
FR Chicken Withdrawal Pellet 2	P70053	50 to kill	15.1	12.0

As with all our feeds, the Free Range Chicken range comes with the “GLW Positive Response Commitment”, including access to experienced technical support, dedicated customer service, raw material, and transport teams, ensuring that you receive what you want, when you need it.
